U.S. Patent and Trademark Office PTOL-303 (Rev. 4-05)

Continuation of 3. NOTE: The claim amendments change the scope of the claims, which requires further consideration. Furthermore, Applicants' arguments regarding the 101 rejection of Claims 1 and 6 are not persuasive in view of the reasons to finth in the find Office action and of the following reasons that are responsive to Applicants' arguments in the Remarks filed 2/15/05. Claim 1 recites a method of testing an operational integrated software system in the preamble. The recitation of this method is construed to be merely an intended use of the method. Moreover, there is no indication that the method is a computer-implemented method, which would thus direct the claim to statutory subject matter. The steps recited in the body of the claim can be interpreted as something that can be done by a person as a mental step or using pencil and paper (the modifier "automatically" can be interpreted to mean force or produced as if by machine' and would not infer that this step is to be performed by a computer, unless the preamble recites that the method is a computer-implemented method). As for Claim 6, the specification describes the claimed means-plus-functions as software based entities are embodied in any tangible computer readable media. Therefore, Claim 6 is not directed to statutory subject matter.
